

## **New CISA Mito Sensor for Fire Doors. Assisted Access Always Guaranteed.**

The CISA Mito range for fire doors has recently expanded with the introduction of **Mito Sensor, the new certified electronic lock that allows remote opening of the external handle, enabling instant access to authorized personnel in restricted areas** such as offices, technical rooms and laboratories.

The operation is simple and immediate, as explained by Chiara Ciardetti, CISA Product Platform Specialist. *"**The electronic lock manages the external handle of the fire door, activating or deactivating it through a signal. To facilitate and expedite user access, an LED can be paired, signalling red for denied access and green for door opening, giving the green light for entry. The system is highly flexible and, thanks to the clean contact, allows remote door opening through the most common access solutions in the market (badges, pins, transponders, fingerprints, etc.). The opening can also be timed, with a range of 3 to 30 seconds, after which the handle is disengaged.**"*

The lock is CE certified and tested for 200,000 cycles according to the relevant standards. It **can be installed on single or double-leaf fire doors and combined with CISA panic bars**, providing a complete, efficient and customisable solution with various functionalities developed by CISA to meet the increasingly specific needs of operators. Additionally, **it offers reversibility for use on both right- and left-handed doors, adjustable opening times, and can be powered by both DC and AC current.**

CISA Mito Sensor is the ideal solution for managing fire doors installed in passageways and emergency exits with utmost safety, thanks to remote control opening and excellent visibility of the access signal.

CISA, a brand of Allegion, is one of Europe's leading providers of security and access control systems. Since its foundation in 1926, it plays a primary role in satisfying the security requirements of any type of building with dedicated electro-mechanical solutions, which enable real-time access control and management. Whether it's residential homes or business centers, schools or health and hospitality facilities, safety is our main concern. For more, visit [cisa.com](https://cisa.com)

### **About Allegion**

Allegion (NYSE: ALLE) is a global pioneer in seamless access, with leading brands like CISA®, Interflex®, LCN®, Schlage®, SimonsVoss® and Von Duprin®. Focusing on security around the door and adjacent areas, Allegion secures people and assets with a range of solutions for homes, businesses, schools and institutions.
